Problem 4 - Family Budget

Statement

Develop a software system that helps a community of members (e.g. family) for the management and planning the budget.
The program will allow:
a) adding a new member of the community with information regarding the income he/she contributes monthly at the community budget, respectively the costs he/she generated inside the community.
b) adding of a new entry (income or cost) at the budget management;
c) listing the evolution of incomes/costs for a member.

To do
- Design and implement a Java application for the given statement problem.
